

## Sleep Tight.....

**Chemical free!**

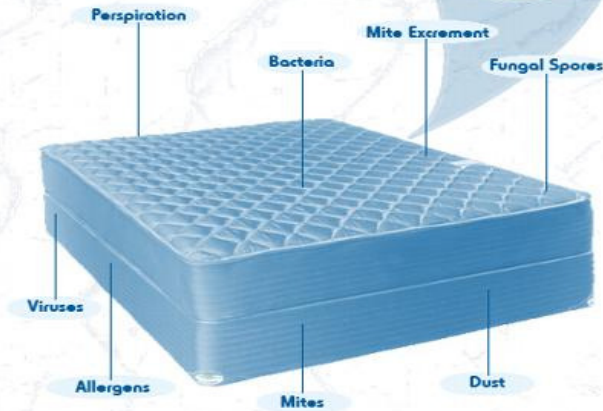

Cleans, Sanitizes and **KILLS** bed bugs, dust mites, and all other pathogens.

The SaniClean System is designed to deeply penetrate the mattress and kill all contaminants instantly.

The dead contaminants are then extracted out of the mattress. During the process the mattress is actually cleaned not just sanitized.

**What's under your covers!?**

## Cleans & Sanitizes

Cleans and Sanitizes with INTENSELY HEATED JETS OF STEAM. The Steam Vapor molecules are smaller and hotter than regular steam. These Steam vapors penetrate deeper, and clean and sanitize better.

This very highly heated steam is 95% dry; leaving little moisture after cleaning. It kills dust mites, bed bugs, and all other pathogens instantly. Extremely SAFE to use, and uses NO CHEMICALS.

Dust mites, fleas, bed bugs, silverfish, e-coli, bacteria, and other pathogens are killed at temperatures from 135 degrees to 165 degrees. Since our machine produces temperatures at twice that, these pathogens are instantly destroyed.

## Kills Bed Bugs & Dust Mites

Our dry vapor steam system kills bed bugs instantly along with their eggs. Its penetrating 300 degree dry steam goes deep into mattresses, furniture, nooks and cranny's where they hide.

Our non chemical dusting application leaves a residual effect in case any are missed. This application is totally safe; in fact it is so safe the product can even be eaten by humans and pets. Actually it is used to keep dry dog food, dry. As safe as it is to humans and pets it is deadly to bed bugs and other bugs, like ants, silver fish, spiders, etc.
